

# KODAK Communicator

## Patient Education System

The need to explain treatment options and the opportunities for doing so create an irresistible combination in today's modern dental surgery. Patients expect more and the new Kodak Communicator delivers. High definition 3D animations which quickly explain treatments and procedures. Over 100 different topics are covered and each is supported by an editable patient advice sheet. Each time you show an animation the event is recorded automatically in your Kodak R4 notes providing a clinical audit

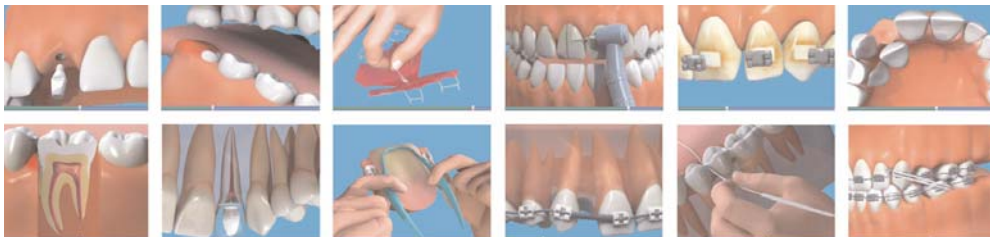

### Kodak Communicator Features:

- Over 100 3D animated sequences
- Over 100 editable Patient Advice Sheets
- Over 2000 before/after clinical photographs

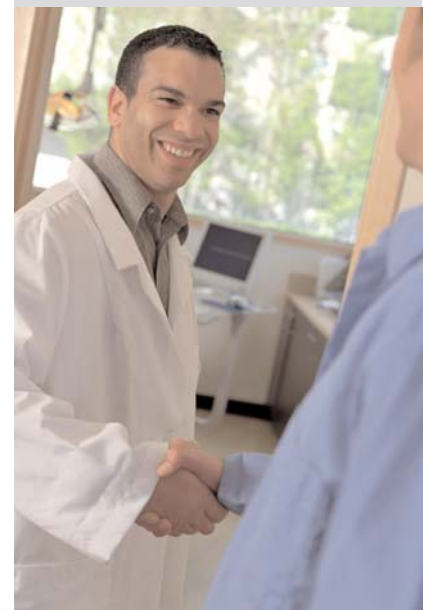

# Help your patients understand and accept your treatment recommendations

The 'Communicator' is fully integrated into Kodak R4 software so that just a single click reveals an extensive menu of treatments and procedures. The animations quickly convey every message, overcoming the language barriers which are so often part of modern dentistry. Each animation can be paused, replayed or annotated allowing you to personalise your presentation to each patient.

A series of animations can be linked together into a presentation for an unattended patient and each event is recorded permanently in the patient's record.

Patient advice sheets are held in Microsoft® Word® format and are completely editable. Each may be printed or emailed to the patient directly from the chair, providing valuable support information for the patient and for the patient's spouse while treatment is being considered.

Kodak Communicator is ideal for Dentists and Hygienists to use with their patients. There are also many specialist Implant and Orthodontic sequences included.
